Educators need to recognize this in order to prepare learners with critical competencies to thrive in a dynamic world. As the world continues to evolve so must educational practice. Digital leadership represents a strategic shift in mindset and actions that work to usher in needed changes to improve teaching, learning, and leadership while building powerful relationships with stakeholders in the process. The time is now to work smarter, not harder, to achieve better results. Using the Pillars of Digital Leadership, a framework to assist all educators to implement sustainable change, attendees will be exposed to actionable strategies to support and enhance current areas of professional practice through a digital lens.</p>

Principal EL believes that resilient leaders and teachers take risks, make courageous decisions, and challenge the status quo. They are able to bounce back from adversity to become innovative and transformational to ensure all students are exposed to an engaging curriculum and effective teaching. Transformational leaders also shift mindsets and inspire students to develop positive attitudes and relationships with others. In his thought-provoking presentation, Principal EL will share how we can develop positive school cultures that foster the social and emotional development of all students, so teachers and leaders can focus on the protective processes that build responsible decision-making and resilience.</p>
